

VESTIS ALUMINIUM

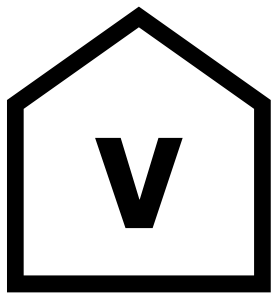

THE AMA STORY

Established in 2012, Architectural Metals Australia (AMA), is expanding material design freedom across Australia and New Zealand. AMA import Italian made sheet metal, designed specifically for architectural applications.

AMA is the brainchild of Victorian based rainwater goods manufacturer, Bayside Flashing & Ventilations Pty Ltd and sister company, Metal Cladding Systems Pty Ltd. Towards the end of 2011, leadership teams from both businesses began to pool their 30 plus years' of experience. They started researching what their local cladding industry was lacking, identifying potential opportunities to better contribute.

After analysing their own experiences, speaking with peers, installers, builders, and design professionals, they discovered quality products were abundant but material diversity and reliable onshore stock, was not.

Today AMA is a rapidly expanding distribution business, providing sheet metal solutions for those who seek individuality.

WHY MAZZONETTO SPA ?

AMA's supply partnerships are carefully selected and qualified to ensure each manufacturer matches or surpasses technology expectations, product performance prerequisites, and aesthetic individuality. AMA works with like-minded businesses who believe in creating unique materials, supported by superior levels of service.

A trusted distribution alliance with Mazzonetto Spa means reliable local stock management, high caliber technical product understanding, continual material development, and access to Italy's finest metal coils.

THE VESTIS COLLECTION

Architectural Metals Australia (AMA) offers a curated collection of Italian made aluminium. Vestis aluminium is specifically designed for European style roof and wall cladding profiles. Most commonly Vestis is specified and processed for Standing Seam, Interlocking, Nailstrip, Shingle, and Flatlock applications. AMA is dedicated to providing quality, workable material solutions which reflect current design trends and assist in realising architectural vision to built reality.

All Vestis aluminium finishes are AS1530.1 and AS1530.3 compliant. Reports available on request.

Coil width: 1200 mm (Pro Range available in 1000 mm only)

Material thickness: 0.80 mm

Weight per sqm: 2.21kg | Weight per l/m: 2.65kg

Material hardness: H 44

Coating: high durability polyester paint

Warranty:

> 3km from salt water, 40 years | 1km - 3km from salt water, 20 years | < 1km from salt water, up to 10 years

**All warranties must be applied for and formally approved by AMA at the time of installation.*

**denotes non-stocked/special order finish*

CONNECTED, FROM CONCEPT TO COMPLETION

AMA views construction as a whole. Trusted relationships, an active industry network, and targeted project involvement, are equally important as importing and distributing quality architectural products.

AMA is a division of Bayside Metal Industries; as a sister business to Bayside Flashing & Ventilations Pty Ltd and Metal Cladding Systems Pty Ltd, AMA is backed by some of the plumbing and cladding industry's oldest and largest local production teams. Collectively, AMA staff have more than 100 years' sheet metal and construction experience, making AMA's service as unique as their product offering.

Specification, account management and marketing teams, work directly with architects, builders, developers, roof plumbers, and sheet metal manufacturers, to ensure when individuality is sought, AMA is there.
